## LOADSTAR@GENIE.GEIS.COM Can't Handle Anonymous Internet Customer Service

Last month there was a small flood of customer service requests via Internet to cancel subscriptions, extend subscriptions, and switch subscription status. That's fine, but when I present a printout of Email from [77907.2344@Compuserve.com](mailto:77907.2344@Compuserve.com) to Torennna, Gayle, Wanda or Linda in Customer Service and say "this guy wants his subscription extended," they'll go, "What? At least give us a customer number."

In the future please Email your entire name and address as well as your customer number so that I (Jeff) can better serve you, and not be tossed out of Customer Service on my sizable, but rapidly shrinking, rear end.

## Editorial: Q-Link Throws In The Towel After Being Down For The Count For Two Years

Jeff Jones (LS) 21AUG1994. As has been expected for two years, *Quantum Link* will soon be no more. Qlink has claimed for years that there were technical problems that prevented them from supporting their C-64 forum. Writing new C-64 software to work with *America Online* would have been pretty easy. Pay me a few thousand dollars and I'd gladly do it in a month -- okay three months.

I am personally convinced that the owners so expected Qlinkers to drop their subscriptions because they would "outgrow" their C-64 that they forced the hand of fate by totally neglecting *Qlink* for years. *QLink* last told *LOADSTAR* that they had about 30,000 subscribers online. This was back in 1990, when we could still raise them on the phone. The last time I checked, the color of money was green, whether it came from a C-64 user or IBM user. If you have 30,000 customers paying anywhere from \$8.95 to \$500.00 per month, you do anything you can to keep them. You wring every last dollar out of that cash cow. You don't shoot it because you think it's going to die soon. In fact you jury rig and patch it and do everything possible to keep making money -- even from C-64 users.

*America Online* is also dropping its Apple II support. A huge exodus is expected to go to *GENie* and *Delphi*, both of which are known to be friendly to Commodore users. Also the Phoenix Network, which exclusively supports the C-64/128, is expecting a big boost. The following is the "Sunset Information" left in every area of *Qlink*.

Dear Members,

As you know, *QLink* was originally launched in November, 1985. In the years that followed you, as our loyal members, have helped us build a unique online community for Commodore computer users. I want to thank each of you for your contribution, your support and your feedback over the years.

The computing industry has changed dramatically since those first days of online communications. Commodore ceased to produce Commodore brand computers in 1993. Sadly, the company has recently closed its doors entirely. The Commodore computer, once a leader in the industry, has been replaced by faster, more powerful systems. Many software vendors no longer support the Commodore operating system.

Now we find, with great regret, that we simply can no longer support the *QLink* service. It has become impossible for us to maintain the product up to a standard of quality that we can be proud of. Many of you I'm sure have noticed a diminished level of product quality in the last few months due to these technical limitations. Without technical support from the industry, we are not able to add new services, fix existing problems, or prevent new ones. Therefore we have made the sad decision to discontinue *QLink* as of November 1, 1994.

We would like to thank each of you for your long and continued support and, if at all possible, keep you as part of our online community.

If you now have the ability to use *America Online* (PC-DOS, Windows or Macintosh), we invite you to convert your membership to one of these other systems. For details on what these versions have to offer and the system requirements needed to run them, see the document in this area entitled "Converting to *America Online*."

For details on the last month of service for *QLink*, important dates and billing information, see the document in this area entitled "Your Final Bill."

We have enjoyed serving you. Thanks again.

Sincerely,  
Steve Case

## Q-Link Deathwatch & Timetable

The following are the important dates regarding the last service period. Again, this is taken from *Qlink*'s own Sunset info. Some of the following information seems to contain some typos as if the editor pasted an old section. I'll leave the text as is:

*Your last monthly fee will be billed to you in September, 1994, based on your usual billing date. No monthly fees will be incurred after October 1, 1994.*

*You will continue to accrue hourly fees until October 31, 1994.*

*The last day of service will be October 31, 1994.*

*Your account information will be maintained for six months.*

*Your last monthly fee will be billed to you in advance, as usual, during September, 1994, based on your usual billing date. No monthly fees will be incurred after October 1, 1994.*

*You will, however, continue to incur hourly charges based on your usage for the month of October. You should receive your final bill for any additional connect-time charges on your credit card or bank statement some time in November.*

*If you have any questions regarding your bill you may contact our billing department by calling our toll-free number 800-327-8532.*

## Lifetime Members

John Brown of Parsec, Inc. told *LOADSTAR* that the moment he saw the overwhelming campaign for lifetime memberships on *Qlink* that he knew *Qlink* would die. It was widely speculated that the membership

# SOFTWARE SUPPORT

## INTERNATIONAL

### We Stock America's Largest Selection Of C-64/C-128

*Thousands of Commodore Owners Choose Us  
As Their One Stop Supplier. Here's Why!*

- \* **Largest Selection of Commodore Software in the U.S.A.!**  
After six years in business, nobody in the Commodore market is more committed to your Commodore than we are. We have well over 225,000 pieces of hard to get software in stock to service your every need. If you've heard of a product, odds are that we can locate it for you. And, we stock most major Commodore titles that are still in production.
- \* **Hardware & Peripherals.**  
Although we can't get keyboards and disk drives any longer, we can offer disks, modems, cables, interfaces, and much more.
- \* **Used Software Selection.**  
Our regular customers know how to stretch their software dollars shopping our Used Software Listings.
- \* **Un-Advertised Specials.**  
Our regular customers enjoy VIP service and great bargains that are hard to pass up.
- \* **Expert Technical Support.**  
As a regular Software Support customer, you have access to the most knowledgeable Commodore technical departments in the country. Of this, we're darn proud.
- \* **Friendly & Courteous Order Takers.**  
You'll have a hard time finding order takers as anxious to help you as Sandy, Mike and Claressa.
- \* **Fast Order Processing.**  
Thanks to our automated computer system, huge inventory and efficient shipping staff, most orders are processed the same day.
- \* **Walk In Sales Department.**  
We welcome visitors to our warehouse outlet. The same great deals are available and best of all, no shipping charges.
- \* **Worldwide Distributor Of Major Products.**  
Ever hear of Maverick, Super Snapshot, Super 1750 Clone, and the 1581 Toolkit? We've been actively involved in the ground up production and world-wide distribution of these and many other fine Commodore products.
- \* **Purchase From Us With Confidence.**  
We were very pleased when the Better Business Bureau came to us and told us that our outstanding reputation qualified us as members in their organization. We're here to stay, not a fly by night, here today and gone tomorrow outfit.
- \* **Extensive Catalog.**  
Our contacts at other mail order companies have told us that producing a catalog such as ours is too time consuming and worst of all - too expensive. We say it's the least we can do for our customers, and wouldn't have it any other way. Simply call or write for your free copy.

# THE MOST AMAZING MUSIC OFFER EVER!

## THE COMPLEAT DAVE

For 10 years LOADSTAR subscribers have enjoyed the music of Dave Marquis. Over 250 Songs, all of them classic melodies from yesteryear, have been arranged and transcribed by the Master of Music and now they're available in one gigantic 8-hour collection -- for only \$20 postpaid! They are all standard SID PLAYER or Songsmith™ format. *Music Star*, included, will play the collection for hours. The collection comes on three 1541 disks (both sides) or two 1581 disks. If you enjoy SID music, you owe it to yourself to get *THE COMPLEAT DAVE*.

TWO 1581 DISKS OR THREE 1541 DISKS CRAMMED WITH SID MUSIC

**\$20 POSTAGE PAID!**

Send check or money order for \$20.00 to Softdisk Publishing

Box 30008, Shreveport LA 71130-0008

Or Call 1-800-594-3370

Two 1581 disks #070523 Three 1541 disks #070525

## BLOCKBUSTER COMBO PACKAGE!

If you've been putting off getting that new FD drive from CMD, now is the time. For \$250, you'll get a brand-new CMD FD-2000 high density 3.5-inch drive AND a full year's subscription to *LOADSTAR*, the biggest name in monthly software for your C-64/128.

If you like *LOADSTAR* on a 1541, you'll love it on a CMD Drive! No more flipping disks. All of *LOADSTAR* fits on one disk -- and it's faster!

The FD-2000 can handle 1.6 megabytes. Twice as much as a 1581 -- about 8 times the 1541, with greater reliability! You can even copy unprotected (and *some* protected) 1541 software directly to the FD-2000 and run as if on a 1541! File and disk Copiers INCLUDED!

1 FD-2000! CARDSTAR! GAMESTAR!

1 Year  
Of *LOADSTAR* 64  
On 3.5-inch Disks!

**Get An FD-2000 And A 1-Year  
Subscription to *LOADSTAR*!  
Together for \$250!  
3.2MB FD-4000 Combo \$310!  
Call 1-800-594-3370!**

We'll even throw in **CARDSTAR 1** and **GAMESTAR 1**, two of *LOADSTAR*'s most popular products, on one 3.5 inch disk so you'll have something to try out in your new drive right away!

\$10 Shipping US. \$20 Air mail to Canada. \$21 UPS to Alaska, Hawaii and Puerto Rico. \$50 International. Allow 6-8 weeks for delivery of drive. For Real Time Clock option add \$20.00. The RTC places a time and date stamp on files, and allows for automatic setup of programs such as *Lettermeister*, *CALENDAR-64* and *GEOS*. *GEOS* patches included on system disk.

drive, in which Qlink members paid \$99 in order to waive all future monthly fees, was a covert attempt to generate funds to launch America Online, which is now a reknowned telecommunications giant.

Oddly enough Qlink comes through on this lifetime membership by allowing Qlink users to join America Online with lifetime memberships. All they have to do is (uh oh) buy a PC and a modem -- and do it quick! The following is also from the sunset information.

*Lifetime memberships on QLink will be honored with America Online memberships. If you have a QLink Lifetime Membership and would like to transfer that membership to a new America Online account, please follow these instructions:*

**1:** Order your free America Online software kit by calling our toll free number, 1-800-827-6364.

**2:** After you register your new account, please contact our billing department through the keyword BILLING or by calling 1-800-827-6364. One of our customer service representatives will verify your new account information and convert your Lifetime Membership to your new account. Please note that you will need to choose a new screen name for your America Online membership. Screen names are not transferable.

*Please note that your QLink account will automatically be canceled on November 1, 1994. You must register a new America Online account by April 1, 1995 in order to maintain your Lifetime Membership status.*

## Is There a 1 Gigabyte RAMLink In your Future? Intel Claims Flash Memory "Breakthrough"

07/28/94 SANTA CLARA, CALIFORNIA, U.S.A., 1994 JUL 28 (NB) -- In October, 1990, Intel announced its flash memory at a cost of \$256 for one megabyte (MB). In a special press conference attended by Newsbytes, Dr. Stephan K. Lai, director of Flash Technology Development and Manufacturing for Intel, said that his group had achieved a "breakthrough" in flash technology that allows two or more bits of data to be stored in a single cell.

Naming the new technology -- multilevel cell (MLC) -- Intel predicts that by the year 2000 it will develop gigabit (GB) flash memory at a cost of \$.50 per MB. Commercial development is not expected to begin until sometime in 1995. The company also predicts that the ability to store four bits per cell can be accomplished.

Dr. Lai claimed that his group had proven and established the basic physics involved in the process of MLC technology. He also stated that there was much to achieve now with the engineering problems involved.

Intel says MLC Flash applications will be effective in mass storage, such as flash arrays and PCMCIA (Personal Computer Memory Card International Association) cards, digital audio, digital photography, digital video and computer game cartridges.

Lai said, "This kind of cost factor enables applications that we have not even thought of." Co-inventor of Intel's ETOX flash memory technology, Lai, added, "ETOX flash technology it perfectly suited for this achievement."

At the press conference, Intel demonstrated its first accomplishments of MLC storage.

He further commented, "In four generations of flash memory through ETOX IV, the flash density has increased by a factor of 64, while the media cost reduced by a factor of 32."

In 1988, when Intel first announced its flash memory technology, the initial cost was \$640 per megabyte.

[Note from Jeff: This is exciting news. Perhaps the hard drive will go the way of the dinosaur when we can have

## UK Teenager Arrested For US Internet Hacking

08/01/94 LONDON, ENGLAND, 1994 AUG 1 (NB) -- Officers from Scotland Yard's Computer Crime Division have revealed they have arrested a 16-year-old youth in connection with alleged unauthorized access to the Pentagon's computer systems in the US.

Police were requested to arrest the boy after contact with US government security agencies who advised that the youth had been caught in an "electronic trap" set up after worries about system crackers who were freely roaming the unclassified side of the Pentagon's computer network.

Now prosecutors face the interesting prospect of charging the unnamed youth under the Computer Misuse Act in a juvenile (children's) court. This would be the first time such an action has been taken, Newsbytes notes.

To date, other computer misuse cases have been held before a Crown Court, the second level of the UK's judicial legal process. With the juvenile court, however, no such "upgrade" mechanism exists.

Interestingly, some press reports suggest that the CIA was involved in tipping off the British police in the case. Other reports suggest that FBI was involved. Peter Sommer, a London-based security expert, told Newsbytes that he was surprised at the conflict of agency names in the press. "If anything, I'm surprised it was not the Secret Service or the National Security Agency," he told Newsbytes.

"As far as I have seen, the youth is likely to be charged under Section 1 and 3 of the Computer Misuse Act. Section 1 refers to the unauthorized access, while Section 3, the most serious, refers to alteration of data," he said. "This raises the interesting question of what, exactly, the 16 year old has allegedly done."

Police in the case are saying nothing. A spokesman for Scotland Yard told Newsbytes that the 16-year-old has

been released on bail, pending charges under the Computer Misuse Act involving alleged unauthorized access and illegal modification of data.

The Police say that the youth will have a special interview in November of this year, by which time the authorities will have a much better idea of what, exactly, they can charge him with.

While the police are officially saying nothing, the computer press reports that the police's computer crime division claim that they were amazed and stunned by the hacker's knowledge.

"He really was like a character in War Games. There doesn't appear to be any malice behind it and the Pentagon computers he infiltrated held only unclassified data, such as ship designs and simulated battle plans. But we are still trying to assess the damage he has done," said a spokesman. "After that, it is down to the prosecution service and juvenile court to decide what action is appropriate." (Steve Gold/19940801)

## Jeff Gets Arrogant With His RAMLink

After using RAMLink for over three years with absolutely no data loss, Jeff Jones powered down for the weekend without first backing up his RAMLink to a CMD Hard Drive Partition. He returned to work, powered up his system and found his data intact. Don't try this at home!

## Computer Becomes World Checkers Champion

08/26/94 BOSTON, MASSACHUSETTS, U.S.A., 1994 AUG 24 (NB) -- The test of man versus computer has again put man in the losing category as a Silicon Graphics computer checkers program has won out against its human opponent.

In 1992, Dr. Marion Tinsley beat Silicon Graphics' computer checkers program to retain his title of World Checkers Champion. Due to serious illness this week, Dr. Tinsley resigned in the midst of a new championship tournament, tied with six draws, which resulted in a forfeit to the computer. But the new champ was immediately challenged by the number two-ranked player in the world, Don Lafferty.

Checkers may seem pretty simple and straightforward, but Silicon Graphics' Challenge XL computer indicates otherwise, as its 16 processors, a

gigabyte (GB) of RAM, and five 2GB disk drives whirl away analyzing every move.

A temperamental player? On Tuesday, Lafferty won his first victory and the computer crashed. Since this was its first defeat of the tournament, observers joked about its sportsmanship. It was quickly rebooted and prepared for the next match, which it won.

Ashley Mooser, spokesperson for Silicon Graphics, told Newsbytes, "280 billion bits of information are required for the computer to play at this level. It has been estimated that 560 billion bits of data would be required to cover all of the information that goes into a chess game."

The current XL computer is four times faster than its predecessors which set a record of 43 draws, seven losses, and five wins in championship competition with World Champion, Dr. Marion Tinsley.

Dr. Jonathan Schaeffer, creator of the Chinook checkers software running on the Challenge XL computer, sat across the board from Lafferty and replicated Lafferty's moves on the computer's monitor. According to Silicon Graphics, the computer takes about two minutes to analyze its next move.

This championship took place at the Computer Museum on Boston's waterfront. Spokesperson Gail Jennes told Newsbytes, "We are very happy to be able to bring this event to the public. It is a great way to show the contest between humans and machines, as well as showcasing the latest developments in artificial intelligence."

Lafferty, the reigning US Checkers Champion had 1 win and 12 draws with the computer, while the computer also had one win, as of 9:00 a.m. EST Aug 24. A championship is decided by who is ahead after 20 games. Four more games took place Aug. 24 and the final two occurred on Aug. 25. The remaining six games to complete the 20-game championship, all ended in draws. According to championship rules, this means Silicon Graphic's Challenge XL Computer, running Chinook software, is the current World Champion Checkers title holder.

Results with film footage were scheduled for NBC's *Nightly News* with Tom Brokaw on August 25. (Patrick McKenna/19940826/Press Contact: Ashley Mooser, Silicon Graphics, tel 415-390-2863)

Increase Speed Up to 1500% while retaining 100% compatibility

- Speeds up Loading, Saving, Verifying, Formatting and Reading/Writing of Program, Sequential, User and Relative files unlike cartridges which only speed up Loading and Saving of PRG files
- Built-in DOS Wedge plus 17 additional features including file copier, text dump, printer toggle, and redefinable function keys make using your computer easier and more convenient
- ROM upgrade installs easily into most computers and disk drives. Supports C-64, 64C, SX-64, C-128, 128-D, 1541, 1541C, 1541-II, 1571, 1581 and more.

**FD Series**

**3.2 and 1.6 MB 3.5" Floppy Drives**

The FD-2000 and FD-4000 disk drives utilize

today's latest 3.5 inch disk drive technology.

FD-2000's support 800K (1581 style) and

1.6 MB (High Density) formats, while the

FD-4000 also offers support for the 3.2 MB (Enhanced Density) disk format. Fast and reliable, they support 1541, 1571 and 1581 style partitions, Native Mode partitioning and can actually read and write 1581 disks. FD's feature built-in JiffyDOS, SWAP button and optional Real Time Clock. High capacity, speed and compatibility make the FD right for every application, including GEOS.

**RAMLink**

**Power-Backed Expandable REU**

The fastest possible form of storage, RAMLink provides instant access to files and retains data while your computer is turned off. Easy to use and expandable up

to 16 MB, RAMLink utilizes the same powerful operating system found in CMD Hard Drives. Unlike Commodore REU's which are compatible with less than 1% of commercial software, RAMLink supports more than 80% of the commercial titles. RAMLink also offers built-in JiffyDOS Kernel, SWAP feature, reset button, enable/disable switch, pass-thru port and RAM port for REU/GEORAM use. RAMLink offers maximum speed, expandability and compatibility with all types of software and hardware including GEOS.

**HD Series**

**SCSI Hard Drive for the C-64/128**

HD Series Hard Drives are available in

capacities up to 1 GB, are fully partitionable,

and can emulate 1541, 1571, & 1581 disks

while Native partitions utilize MS-DOS-style

subdirectories. HD's connect easily to the serial bus or parallel via RAMLink. Includes built-in JiffyDOS, SWAP feature and RTC. HD's offer superior compatibility with most commercial software including BBS, Productivity and GEOS. And with new pricing, HD Series drives offer the lowest cost per megabyte of any C64/128 storage device.
